MINI COOPER CLUBMAN

DESIGN

Based on the “shooting brake” concept (modified coupé fitted with an estate-like rear), the MINI Clubman combines sleek contours, all-round muscle and a revolutionary door concept reminiscent of the Austin Mini Countryman and the Mini Clubman Estate. But it’s not just about aesthetics: expanding upon the original design-to-space concept, the MINI Clubman upholds the reputation of MINI as the one-off small car that creates space on the inside and saves space on the outside.

SAFETY

Six airbags, Anti-lock Braking System (ABS with CBC, EBD and Brake Assist), standard-feature Dynamic Stability Control (DSC), super-sturdy bodywork and disc brakes all round: safety is definitely writ large with the MINI Cooper Clubman.

ENGINE

There’s get-in-and-go feeling aplenty in the MINI Cooper Clubman, with an irrepressible 122 hp engine guaranteeing a sensation-soaked drive on bends and straights alike. What’s more, it’s all good, clean fun: an engine with fully variable valve timing keeps emissions and fuel consumption down to a minimum.

Fuel consumption combined (ltr/100 km) 5.5 [6.5]

CO2 emission (g/km) 129 [152]

DRIVING EXPERIENCE

As with all MINI models, the wheels of the MINI Clubman are pushed out to each corner of the car, giving it a low centre of gravity and superb go-kart style handling. This is enhanced by the multilink rear suspension – a rare feature in a small car. It makes sure that the rear wheels are always in full contact with the road, no matter how bumpy. Gripping stuff!
